Personal Finance Tracker and Analyzer

Team №5:

Davydova Maria
Mikhaylenko Alexey
Tagin Nikolay
Ivanov Maxim

Problem Statement

Core Problem: people need a simple, accessible way to track, analyze, and understand their personal finances.

Our Solution

Work with
transactions

Upload receipts

Analyze expenses

Visualize data

Key Features:

- Filtering system
- Time analysis
- Budget tracking tools

Impact

We help users:

1. Understand spending habits
2. Reduce unnecessary expenses
3. Improve financial discipline

Core Impact: helping people control spending, build financial discipline, and improve quality of life.

Why not Excel?

Automation

- Calculations and analysis are automatic
- No manual formulas required

Logic & flexibility

- Built with Python → easy to expand
- Can add new features (AI, APIs etc.)

Cleaner workflow

- no messy tables or broken formulas
- structured data handling

OCR receipts (api.ocr.space)

green store
